HOTEL CHANGE - TAKE NOTE!

The TPA ANNUAL MEETING & SUMMER GET-A-WAY, scheduled in Nashville this Aug. 16-17, will now be held at the DoubleTree Hotel downtown. This event was originally to be at the Hilton downtown, but due to major renovations planned for this summer and fall we have had to change. We apologize for any inconvenience. Please let the TPA office know if we can assist anyone in making room reservation changes. This is the hotel used by the U.S. Poultry Association when they hold meetings and events in Nashville and it will be great for our event.

KEYNOTE SPEAKER ANNOUNCED

Mr. Davis Lee will be the keynote speaker for the TPA annual meeting this Aug. 16th in Nashville. Mr. Lee is the Chairman, CEO and Owner of Davis Lee Companies, which includes AlaTrade Foods and Lee Energy Solutions. AlaTrade Foods has three poultry processing plants in Alabama.

Mr. Lee is extremely involved with, and dedicated to, the poultry industry and was named to the Alabama Poultry Association’s Hall of Fame in 2010. Be sure to plan to be in Nashville by 1:00 CST on the 16th to hear his most inspiring comments about the industry.

November 5-8 - TPA Grower Meetings
Tentative dates and locations:
- Union City - Nov. 5th
- Cookeville - Nov. 6th
- Cleveland - Nov. 7th
- Shelbyville area - Nov. 8th
Meet Your TPA Vice President, Scott Black

Scott Black has served as TPA’s First Vice President the past two years and will take over the reins as President this August during the Annual Meeting Aug. 16th in Nashville at the DoubleTree.

Scott began his career in the poultry industry after graduating from the University of Tennessee at Chattanooga with a double major in Business and Human Resources. Starting out with Seaboard Farms in Chattanooga as a Broiler Service Technician, he remained in that position after the company was acquired by ConAgra Foods. Scott then went to work for Pilgrim’s Pride as their Broiler Manager to oversee the broiler program. While with Pilgrim’s Pride he had the opportunity to visit many of their operations within the company including their Mexico operation. In 2011 he then joined Cobb VanTress as Broiler Specialist for North America and continues in that position today.

Scott’s role for Cobb includes working with Live Operations Managers, Broiler Managers, Service Technicians and Growers from Canada down to Panama. Cobb amazingly has more than 9.1 billion broilers in this region. Scott’s duties include sharing the most efficient way to achieve the genetic potential that the Cobb broiler can deliver through best management practices.

Scott and his wife of almost 17 years, Sara, have three wonderful children, Clay, 13, Riley, 11, and Emmi, 5. Sara continues to home schools their children and they live near Cleveland, TN.

Scott himself enjoys the outdoors, spending time with his family, and just about any sport, “except running”, he says.

If you’ve never had the pleasure of meeting Scott, we hope that you get to soon. He’s a man of great vision, he has lots of energy, and he is very passionate about his family, his position with Cobb, and the overall poultry industry.

Scott getting the April 25th TPA spring golf tournament underway!

Ventilation & Housing Tips

**Auburn University’s** National Poultry Technology Center and the Auburn Cooperative Extension Service have current publications available at [www.poultryhouse.com/](http://www.poultryhouse.com/) and [www.aces.edu/poultryventilation/](http://www.aces.edu/poultryventilation/). Ventilation and housing topics include:

- Water System Inspection Pays Off (April, 2013)
- Is Poor Drinker Management Costing Fuel Dollars? (Jan. 2013)
- Converting to Natural Gas
- Get Ready for Hot Weather
- Generator Tips
- Lighting Tips
- House Tightness
- Tunnel Cooling
- Fan Runtime Calculator (last updated April 15, 2013)

The **University of Georgia** has their Poultry Housing Tips available at [www.poultryventilation.com/tips](http://www.poultryventilation.com/tips). Over 200 publications on poultry housing and ventilation can be found at this site, including:

- Attic Inlets Operation Guidelines (Feb. 2013)
- Optimal Static Pressure When Using Air Inlets (Jan. 2013)
- Best Performing Tunnel Fans – 2012
- Keys to Litter Moisture Control... Fresh Air, Heat & Air Movement
- Forced Air Furnaces Can Reduce Bird Cooling During Hot Weather
- Plastic Evaporative Cooling Pads
- The Inverted-V Migration Fence
- Pullet House Air Speed - Static Pressure Estimating Sheet

FARM BILL UPDATE

Information and excerpts from Agricultural News, Farm Bill – May 17, 2013

Both the Senate and House Agriculture Committees recently passed their version of a 2013 farm bill. The House Agriculture Committee approved on a 36-10 vote a 5-year farm bill, which is almost identical to a measure that was passed last year. The Federal Agriculture Reform and Risk Management Act of 2013, H.R. 1749, will cost about $940 billion over the next decade, cutting about $40 billion from direct spending. House leadership has committed to having the bill on the floor in June.

In mid-May, the Senate Committee on Agriculture, Forestry and Nutrition also passed a farm bill entitled The Agriculture Reform, Food and Jobs Act of 2013, S. 945. On a vote of 15-5, the bill took less than four hours to be marked up and approved. The bill will cut $23 billion over 10 years. Majority Leader Harry Reid (D-NV) scheduled the bill to be on the Senate floor May 20th. Highlights of the two bills are as follows:

The House-Passed Farm Bill (H.R. 1749)

Passed: An amendment co-sponsored by Reps. Mike Conaway (R-TX) and Jim Costa (D-CA) that repeals the section of the 2008 farm bill that directed USDA’s Grain Inspection and Packers and Stockyards Administrations (GIPSA) to review contract and industry structure practices of the meat and poultry industries.

Passed: An amendment sponsored by Rep. Rick Crawford (R-AR) that would restrict USDA’s Animal and Plant Health Inspection Service (APHIS) from making any changes to the National Poultry Improvement Plan (NPIP). The amendment would keep the physical location of NPIP the same, as well as the current structure. The funding level was set at the current level.

Passed: Rep. Bob Gibbs (R-OH) sponsored an amendment that would prevent federal agencies from giving out personal information of agricultural producers to third-party groups. This amendment is a result of the Environmental Protection Agency’s recent release of data from livestock operations to three environmental groups. The data release, which came about as a result of a Freedom of Information Act request, has gained traction on Capitol Hill.

Passed: Rep. Goodlatte (R-VA) sponsored an amendment that would require USDA to undertake reviews of any EPA regulations that could affect the agricultural community. Goodlatte said that the amendment was in response to EPA’s recent program for the Chesapeake Bay, which required states to develop and put in place plans to reduce nutrient runoff into the bay.

The Senate-Passed Farm Bill (S.945)

Passed: Language that supports keeping the current Governance Committee at the National Poultry Improvement Plan (NPIP) was included in a package of amendments. Funding was set at the current level.

Passed: Poultry Insurance Program establishes a pair of studies on the feasibility of insurance programs to protect America’s poultry growers from catastrophic loss, such as disease outbreaks and bankruptcies of poultry integrators.

What to do with retired chicken houses?

Comments offered by TPA’s Executive Director, Dale Barnett, as a result of inquiries from various Universities and Extension personnel.

For some, tearing down, removing and selling retired chicken houses may be the best business decision in order to reduce insurance premiums and property taxes. Unless these houses are truly justified for storage, or for a subsequent enterprise, they may prove to be too costly just to park a few pieces of equipment under that could be stored elsewhere on the farm. Another option may be to tear down and sell all but one end of a house (to keep for storing equipment under minimal space) in order to reduce insurance premiums and property taxes. Visit with your insurance agent and additionally take a look at the property value placed on these houses to best determine how to proceed. A re-appraisal of property through your tax assessor’s office may be warranted for anyone keeping or removing retired houses if you feel a downward adjustment is in order.

Growers looking to pursue a subsequent enterprise for retired houses are best advised to first visit with their County Extension Agent and their Ag Lender. Diversified farming operations may be able to convert a house into cattle handling facilities or use them for lambing or kidding operations; or use them for a profitable storage situation or business, for example. University experts with the Univ. of TN, Auburn Univ., TN Tech and Murray State in KY tell us that attempts to convert retired houses into hot houses, hydroponics or other horticulture or aquaculture enterprises have proven to not be profitable when tried or considered by others and are often ill-advised. A serious marketing plan and an in-depth budget analysis including costs of retrofits and utility inputs are of course paramount before proceeding with any idea.
Great seminar if you missed it!

Dr. Trisha Marsh-Johnson gave a great presentation the morning of the golf tournament titled *Interventions & Management Strategies for the Reduction of Salmonella & Campylobacter* (from the pullet farm through post-chill at the poultry processing plant). The seminar was proudly sponsored by the Jones Hamilton Company, made possible by TPA Board member, Clint Lauderdale. Dr. Johnson is with Veterinary & Environmental Technical Solutions, PC, and can be available for consultation and plant inspections. Anyone who would like to receive a copy of her presentation from this seminar is welcome to contact the TPA office at 931-225-1123 or email dbarnett@tnpoultry.org.
**AUCTION ITEMS NEEDED**

Several great auction items have been donated and committed thus far for the 2013 TPA fundraiser auction in Nashville this Aug. 16-17th during the Annual Meeting & Summer Get-Away. These items include a custom made fire pit/grill, pellet stoves, golf clubs, cabin get-a-way packages, hunts, and more. Please contact Eric Killen (The Vincit Group), Dale Carroll (Lee Energy Solutions), Frank Dougherty (Aviagen, Inc.) or the TPA office (931-225-1123) to make your commitment.

**PROPANE PRICING UPDATE**

Spot pricing from Mount Belvieu, TX for May, 2013 ranged from $0.902 to .968 per gallon, with an average price of $0.935/gal. Prices earlier in the year started out in the low 80 cent range.

Allowing for a reasonable average of 41 cents per gallon for tariffs and handling & delivery, this establishes a current delivered price at $1.35 ($1.31 to 1.38) for contracts established during this time period for most areas in Tennessee. Larger accounts can often negotiate a price lower by as much as 5 cents or more.

For growers and complexes in the southeastern and eastern regions of Tennessee, TPA allied member company Thompsen Gas is available to discuss propane and farm diesel with you. Contact James Watson at 706-851-4378 or Robby McKim at 706-455-8426 for more info.

If any areas in TN are currently paying significantly more than $1.40 per gallon for propane please let the TPA office know at 931-225-1123, or dbarnett@tnpoultry.org, so this can be explored on everyone’s behalf.

To follow Mount Belvieu, TX spot pricing for propane go to: www.eia.gov/dnav/pet/hist/LeafHandler.ashx?n=pet&s=eer_eplpa_pf4_y44mb_dpg&f=d
HUBBARD, LLC - Norma Fernandez joined Hubbard in January of 2013 as their International Sales Coordinator responsible for sales coordination, health documentation & freight logistics to Latin America, Central America, Europe, the Middle East, Africa and Asia. She will be working out of the Pikeville, TN Regional Customer Support Office reporting to Jay Daniels, Director of Operations, in charge of production planning, customer support, transportation & marketing. Leslie Eggleston has been hired for a flock supervisor position with Hubbard for the Pikeville complex. Leslie is a MTSU graduate and spent his career previously in the commercial egg industry with Cal-Maine Foods, Inc.

KEYSTONE FOODS - Equity Group, Kentucky Division. BJ Svagl is on an employee work sabbatical to spend a year at their China operation. Tony Delk will be the plant manager in Albany, KY during this time.

TYSON FOODS, INC. - Vanessa Brazelton became the Shelbyville complex’s Live Haul Manager in February, 2013.

Tyson’s Meals that Matter™ disaster relief trailer and cooking teams from several Tyson plant locations arrived in Moore, OK soon after the devastating tornado hit May 20th, to begin providing meals to victims and relief workers. Depending upon the need, the trailer and cooking teams could be on site two to three weeks. Team members from the Shelbyville Complex previously assisted with disaster relief efforts as a result of hurricane Sandy.
